

Checkpoint 1:

Dane and Makayla met after tagging until the first checkpoint to see how well our agreement was.

We had various issues such as forgetting to tag the desks (Makayla) or tagging too many decorations instead of combining them (Dane).

We decided that Gaming Keyboards would be RGB and Mechanical, Gaming Mice would be RGB or from companies like Corsair and Razer, we agreed that gaming mousepads would have RGB and everything else would be a generic mousepad.

We also split up the rest of the images between the two of us and will reconcile after we finish tagging to put together our files.
